Overview and index

This document lists every client agent video AIREV has built on OnDemand: 23 videos across 11 organizations. Companies are in alphabetical order, each starting on a new page. Every video has its title, a link, the systems it connects to, and a description of what the video shows.

All 23 videos are on Google Drive, and the full collection is in one shared folder: OnDemand Agent Videos folder.

Every link in this document is clickable in both the Word and PDF versions.

2 VIDEOS

ADQ

Oracle HCM Fusion Agent

Video	Watch on Google Drive
Connects to	Oracle HCM Fusion (via MCP)

An MCP-powered agent that lets ADQ users work with Oracle HCM Fusion in natural language. The video shows it retrieving employee leave balances without complex setup. It then generates complete absence records, handling employee validation, project tagging and leave status automatically.

ManageEngine Agent

Video	Watch on Google Drive
Connects to	ManageEngine

Connects OnDemand to ADQ's existing ManageEngine infrastructure, so request management happens from a single interface. Users fetch requests or tickets, pull full details by request ID, add comments and update statuses in real time. The result is clearer team communication and faster ticket resolution.

1 VIDEO

APCO

TrumpMeter

Video	Watch on Google Drive
Data sources	Media coverage, social virality, public sentiment

A market intelligence agent that monitors, quantifies and analyzes the financial impact of presidential communications, policy announcements and social commentary in real time. It combines its data sources into a multi-factor impact score, showing sector-by-sector performance shifts and equity index volatility. Outputs include predictive risk assessments, technical watch levels and automated alerts, so decision-makers can anticipate policy-driven market catalysts.

3 VIDEOS

Burjeel Holdings

Website Generator Agent (HTML Page Generator)

Video	Watch on Google Drive
Works with	Imaginary Image Generator and other OnDemand generative tools

Turns natural language prompts into fully functional, responsive website landing pages. It analyzes each request and collaborates autonomously with existing generative tools, such as the Imaginary Image Generator, to produce the layout code, visual assets and interactive elements like contact forms and FAQs. Users can design, deploy and launch targeted web pages from a single conversational query, with no manual coding.

Google Ads Agent

Video	Watch on Google Drive
Connects to	Google Ads (customer ID and refresh token)

Connects directly to a Google Ads account so marketing teams can query it in natural language. After authenticating with a customer ID and refresh token, users ask for specific performance data; the agent builds an execution plan and retrieves live campaign analytics such as clicks, impressions and lead generation. It automates campaign monitoring without manual dashboard navigation, and lays the groundwork for end-to-end ad creation, optimization and management within OnDemand.

Meta Marketing Insights Agent

Video	Watch on Google Drive
Connects to	Meta ad accounts, personal or business (user access token)

Connects to personal or business Meta ad accounts to simplify marketing analytics through natural language prompts. After authenticating with a user access token, it lists all active campaigns and ads, or uses fuzzy matching to find a specific campaign by name. It returns real-time performance metrics, including clicks, impressions, CTR and ad spend, directly in the chat, removing the need to navigate Ads Manager.

1 VIDEO

Department of Government Enablement (DGE)

Sentiment Analysis Agent

Video	Watch on Google Drive
Data sources	Social media channels, news outlets, subreddits, app reviews

From a single prompt, the agent uses specialized tools to gather public feedback autonomously across its data sources. It deduplicates the data, runs sentiment analysis on thousands of individual data points, and categorizes insights by platform and feature performance. In under two minutes it produces an executive-ready report: top insights, a master evidence table of real user feedback, and strategic recommendations.

1 VIDEO

Emirates

Currency Devaluation Agent (Forex Agent)

Video	Watch on Google Drive
Data sources	Live FX rates, web research, social media sentiment
Delivery	Email, team messaging

Monitors early warning signs of currency devaluation across volatile global economies. It combines live foreign exchange rates, web research and social media sentiment analysis, then synthesizes the macroeconomic picture into structured, multi-page PDF intelligence reports. Using the OnDemand workflow builder, it can be scheduled to run at recurring intervals and send each risk assessment to stakeholders automatically.

1 VIDEO

Etihad Credit Insurance (ECI)

Intent & Scoring Agent

Video	Watch on Google Drive
Connects to	Microsoft Dynamics 365

A digital worker that automates lead qualification and CRM data entry for Etihad Credit Insurance. It processes raw sales conversations and scores each prospect on five dimensions: fit, need, urgency, authority and engagement. It then updates Dynamics 365 in real time, upgrading lead ratings and logging the scoring breakdown to the timeline with no manual effort.

2 VIDEOS

Inception

Monday CRM Agent

Video	Watch on Google Drive
Connects to	monday.com

Brings monday.com into the OnDemand workspace so teams can reach their tasks, workflows and data through simple conversational commands. It interprets each request, retrieves live data from monday.com, and displays project snapshots such as board names, task lists, assignees and statuses in real time, with no manual searching or filtering. The video also outlines planned capabilities: automated workflow execution, smart sorting and predictive task recommendations.

Monday & Google Forms Automation Agent

Video	Watch on Google Drive
Connects to	Google Forms, monday.com, email notifications

Automates Inception's legal request workflow end to end by connecting the Google Forms and monday.com agents on OnDemand. When a user submits a legal inquiry through the Inception AI Request Portal, the Google Forms agent reads and extracts the new form data instantly. The monday.com CRM agent then creates a task with the request details on the monday.com dashboard and sends a full email notification, giving immediate visibility with no manual data entry.

4 VIDEOS

Inveniam

Proof of Asset Agent

Video	Watch on Google Drive
Connects to	Blockchain smart-contract digital registry

Verifies real-world assets using unique identifiers such as SHA-256 hashes. Once an asset is verified, the agent immutably records and publishes the verification proof and confidence score on the blockchain via a smart-contract digital registry. It can also query the chain for existing verification statuses, verifier smart-contract details and public transaction explorer links.

Tokenized Assets Agent

Video	Watch on Google Drive
Connects to	Alchemy, QuickNode

Enriches portfolio metadata by turning raw blockchain smart-contract data into investor-ready portfolio views from natural language prompts. It orchestrates underlying agents such as Alchemy and QuickNode to fetch token names, balances and real-time activity, cross-verifying consistency across independent sources. The result is a transparent, tamper-proof, machine-verifiable audit trail that streamlines compliance and removes manual reconciliation.

Crypto Agent

Video	Watch on Google Drive
Connects to	Alchemy, QuickNode

Takes natural language prompts and automatically fetches, enriches and presents raw blockchain data as investor-ready portfolio views. It runs providers such as Alchemy and QuickNode in parallel, removing manual reconciliation and producing tamper-proof, machine-verifiable audit trails for tokenized assets. It also supports real-time cross-verification across independent data sources and automated lifecycle audits, with no code required.

Legal Agent

Video	Watch on Google Drive
Connects to	DocuSign

Parses conversational prompts to identify the relevant entities, such as buyer, seller and asset details, and maps them into document templates without explicit placeholder instructions. It keeps the generated file in memory, converts the Word document to PDF, and sends it for electronic signature via DocuSign. Legal teams go from simple text instructions to a fully prepared, signature-ready agreement with no manual data entry or conversion.

3 VIDEOS

Moro Hub

DDA: AI Governance Compliance Agent

Video	Watch on Google Drive
Knowledge source	Official AI frameworks and data legislation (RAG)

Uses retrieval-augmented generation over official frameworks and data legislation to review proposed AI initiatives for regulatory compliance. It handles local and cross-jurisdictional queries, comparing legal frameworks, mandatory compliance checks and human intervention rights. It also classifies regulatory instruments, separating legally binding laws from non-binding principles and guidelines, so initiatives are fully aligned before deployment.

Dubai Courts: Legal Companion

Video	Watch on Google Drive
Knowledge source	Isolated legal repository

A standalone legal research agent built on OnDemand. It searches an isolated legal repository to answer questions on jurisdiction, statutory time limits and comparative law. Every answer is fully grounded, with exact, verifiable legal citations, returned within seconds.

KHDA: Parent & Student Service Assistant

Video	Watch on Google Drive
Knowledge source	Official KHDA policy repositories, service manuals and guidebooks

Answers complex educational inquiries, school onboarding questions and administrative edge cases for the Knowledge and Human Development Authority. It connects directly to official policy repositories to give parents and school administrators grounded, structured responses. Every answer includes clickable citations to the official service manuals and guidebooks, so users can check the guidance against the source.

1 VIDEO

North Pole Hoops

Email Customer Support Agent

Video	Watch on Google Drive
Connects to	Email plugin, custom knowledge base

An automated OnDemand workflow that handles inbound customer emails for North Pole Hoops. When an email arrives, it triggers a large language model to parse the message, work out the customer's intent and consult a custom knowledge base for the right answer. It then writes a tailored, formatted reply, sends it back to the sender through an email plugin, and logs the full interaction.

4 VIDEOS

Presight

Presight Enterprise Assistant

Video	Watch on Google Drive
Works on	Personnel and organizational hierarchy data

An enterprise-grade AI assistant that executes natural language queries with speed, precision and context awareness. Its reasoning engine breaks down complex prompts to run multi-layered, multi-criteria filtering, for example sorting personnel by nationality, age range, previous employer and job role. It can also navigate organizational hierarchies to retrieve team structures, direct reports and key employee details.

Outlook Assist Agent

Video	Watch on Google Drive
Connects to	Microsoft Outlook (OAuth), research tools

Connects to an Outlook account over OAuth and sends context-aware emails on the user's behalf. Working alongside research tools, it analyzes uploaded material such as meeting transcripts and runs external research for extra insight. It then writes and sends professional follow-up emails, complete with meeting summaries, market data and assigned action items, directly from the user's inbox.

AI PR Bot

Video	Watch on Google Drive
Connects to	Bitbucket

An AI code review assistant that integrates with Bitbucket to automate pull request reviews. It fetches code diffs and, depending on the command, produces a deep technical analysis, a high-level summary for stakeholders, or a full senior-level code review. It posts its findings and line-item feedback directly as pull request comments, helping engineering teams ship better code faster.

Mercedes F1: Race Dispute Appeal Generation Agent

Video	Watch on Google Drive
Data sources	Official FIA regulations, race telemetry, historical precedents

A custom, white-labeled platform built on OnDemand for Mercedes F1 that automates the generation of complex legal appeal documents. From a single conversational prompt, a suite of collaborating agent tools retrieves the official FIA regulations, analyzes the relevant race telemetry and identifies historical precedents to build the case. Within seconds, it produces a fully formatted, data-backed appeal document ready for official submission to the race stewards.
